**Subject:** Public Comment on We Will Chicago Draft Framework Plan

[Warning: External email]

Please accept the statement below as my public comment on the We Will Chicago Draft Framework Plan. My organization is listed for identification purposes only.

Unfortunately, outside of some data and vague goals, most of the 600 policy recommendations made by leaders from across the city were not included in the draft plan that was released in mid July 2022 . In contrast, many pages of the City of Chicago 1966 Comprehensive Plan, have very specific recommendations that often name specific infrastructure and institutions that are to be built and often with specific funding sources named. I believe that the 600+ policy recommendations should be integrated into the plan and not listed separately.
